WHAT TO EXPECT WHEN GETTING A NEW ROOF

1. Please walk around the exterior of your home and take any valuables inside to store them somewhere safe.

2. Clear or remove anything that may be in your driveway so we have a clear work area.

3. Warning! It may get messy when we are installing your roof but before we leave the entire job site will be cleaned.

4. If you have any pets please keep them indoors or somewhere safe for the days that we are working.

5. Move deck table/chairs, solar lights.

6. Do not drive into driveway when work is in progress (may be stray nails).

7. Remove ALL valuables and pictures from walls that may fall during installation.

8. If possible mow the lawn a few days before we arrive (makes finding debris easier with shorter grass).

9. After underlayment is installed typically there will be a dry-in inspection.

10. Roof Installation followed by a final inspection.

OUR PROJECTS

DID YOU KNOW?

At Culture Construction we understand the insurance claim process and work diligently to restore the property owners in a timely manner.

We strive to make recovering from storm damage as painless and easy as possible for both the insurance carrier and the property owner.

Once leaks occur, the damage can be extensive due to potential damage from mold, electrical issues, ceiling and wall damage from water and perhaps even personal property losses. The damage can also come very quickly if not initially detected.

Most property owners insurance policy covers damages caused by:

- HAIL
- WIND
- FIRE
- WATER DAMAGE
- FALLEN TREES
